ShelterKing CarPockets are the ultimate protection answer for the Collector or Car Enthusiast to preserve their vehicle in pristine condition for long term or seasonal indoor storage. The CarPocket provides the best in instant and portable protection for any vehicle. Flexible uses include vehicle protection, outdoor furniture storage, and equipment/material storage. The stylish unit provides extra space along the sides of the enclosure, with maximum girth near the center ridge.

CarPockets protect and enclose the bottom and all wheels/tires of

the vehicle unlike competitive covers that drape over the vehicle. Unauthorized inspections are completely prevented.

All vehicles should have a soft cover/material (not included) put over the painted surfaces before applying the CarPocket over the entire vehicle. A small dessicant block is provided to be put into the bottom of the CarPocket to eliminate trapped moisture within the enclosure. ShelterKing CarPockets come complete with a Storage Bag with handles to easily and conveniently store the cover when not in use.

DIRECTIONS

STEP 1

SPREAD CarPocket in storage area, with base centered in desired location. When vehicle is ready, move it into position centered on base.

STEP 2

PLACE soft cover over vehicle and place dessicant under vehicle. Then bring upper half of CarPocket over entire vehicle.

STEP 3

ZIPPER CarPocket around remaining three sides of the vehicle to completely encapsulate and protect vehicle.
